

Aayush Mishra

AI Research Intern | AI Automation Engineer | Intelligent Systems | ☎ +91 8799980995 | ✉ aayushmishra062005@gmail.com
| 🌐 LinkedIn | 🐙 GitHub

Profile

Information Technology final year student passionate about Artificial Intelligence, AI automation, intelligent workflows, and applied AI research. Experienced in building AI-powered systems using Python, PyTorch, OpenCV, n8n, and AI APIs with focus on automation, computer vision, and scalable workflows.

Education

St. John College of Engineering and Management ~ Maharashtra, India

B.Tech in Information Technology | 2023 - 2027

- Coursework: Artificial Intelligence, DBMS, Operating Systems, Computer Networks, DSA
- Focus Areas: Deep Learning, LLM Workflows, AI Automation, Intelligent Systems

Experience

Secretary – Training & Placement Cell ~ St. John College of Engineering and Management | Jun 2025 - Present

- Coordinating placement activities, recruitment workflows, and technical event operations
- Managing communication processes and improving operational coordination across teams

AI & Machine Learning Intern ~ IBM | Sep 2025 - Oct 2025

- Worked on AI and machine learning fundamentals with practical workflow implementation
- Explored intelligent systems, automation concepts, and data-driven problem solving

Machine Learning & Artificial Intelligence Intern ~ Tamizhan Skills | Jun 2025 - Jul 2025

- Worked on AI model workflows, data processing, and applied machine learning concepts
- Gained practical exposure to automation systems and intelligent pipelines

Cyber Security & Ethical Hacking Intern ~ Tamizhan Skills | Jun 2025 - Jul 2025

- Learned cybersecurity fundamentals, ethical hacking concepts, and system security practices
- Worked on analytical problem solving and secure system thinking

Projects

RailSafe – AI Railway Safety Framework

- Designed AI-driven incident reporting and operational analysis framework
- Built structured workflows for monitoring and intelligent data processing
- Focused on scalable AI concepts for safety-critical infrastructure systems

AI Assistant for Impaired People | Python, PyTorch, OpenCV

- Developed AI assistant with object detection and sign language recognition
- Implemented real-time voice feedback and optimized event-driven workflows
- Improved usability through intelligent cooldown-based detection systems

AI Social Media Automation Workflows | n8n, AI APIs

- Built automation workflows for AI-generated social media content posting
- Integrated multiple AI APIs for content generation and workflow orchestration
- Developed multi-platform automation pipelines and scheduling systems

Technical Skills

Languages: Python, Java, C++

AI & Research: PyTorch, Deep Learning, Computer Vision, Neural Networks, Prompt Engineering, LLM Concepts

Automation & Tools: n8n, OpenCV, Git, GitHub, REST APIs, MongoDB, AI APIs

Core Concepts: Machine Learning, Workflow Automation, Explainable AI, Backend Systems, Intelligent Pipelines

Achievements

- Research contributor for AI-driven railway safety framework
- Built multiple AI-focused automation and computer vision projects
- Strong interest in frontier AI systems, interpretability, and intelligent automation

Languages

English, Hindi, Marathi, Japanese (Beginner)
